BO-DCA

Destroy Fat Cell

WHAT IS DCA?

Deoxycholic acid emulsifies and solubilizes dietary fats in the intestine, and when injected subcutaneously, it disrupts cell membranes in adipocytes and destroys fat cells in that tissue.

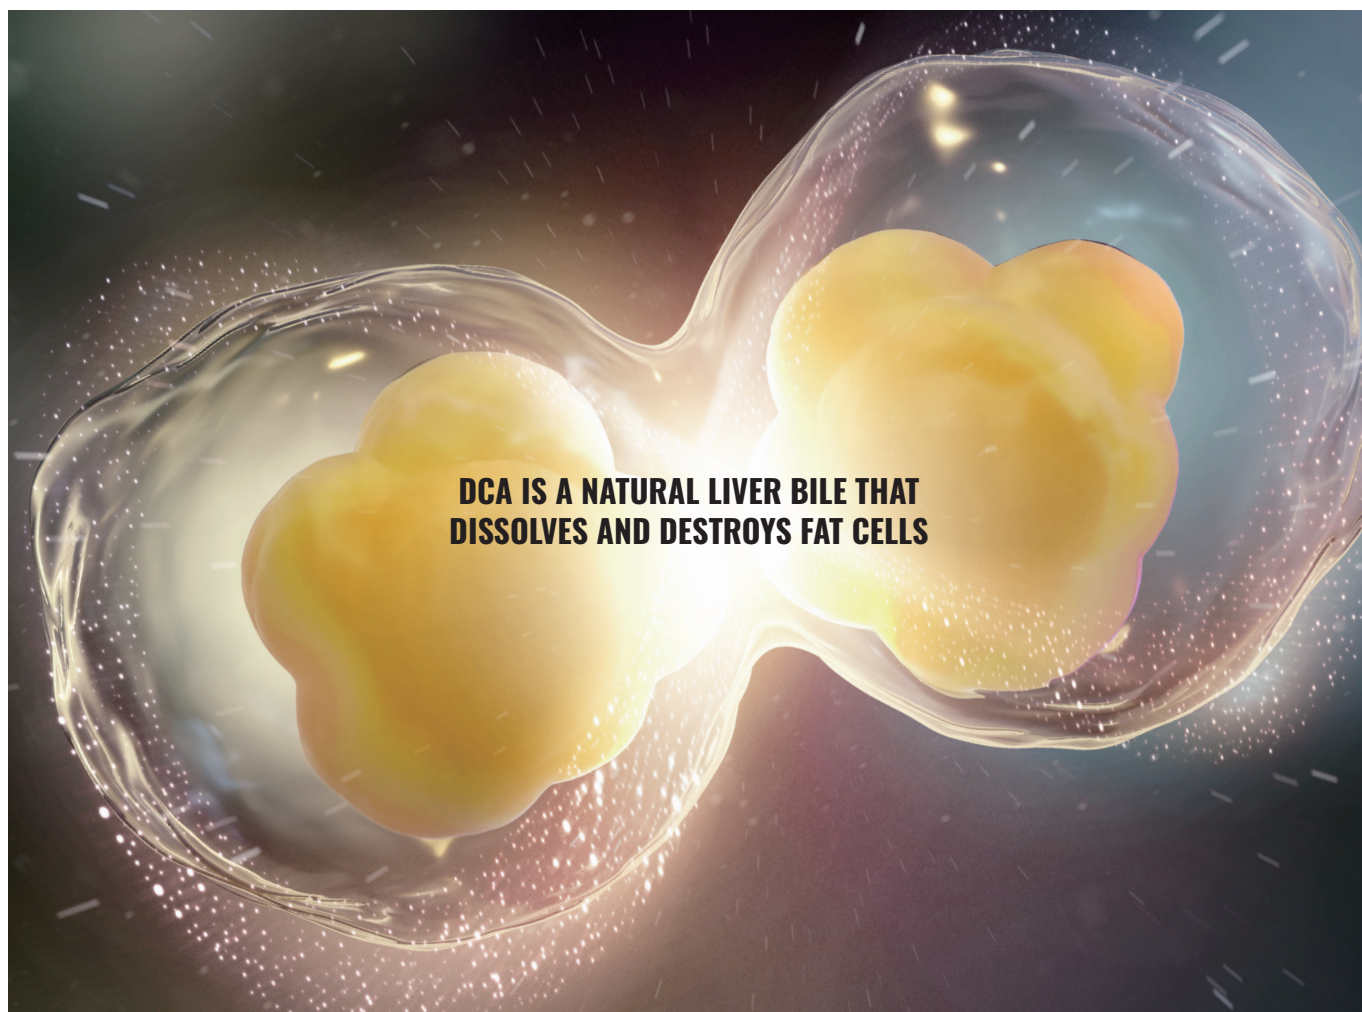

DCA is helping to sculpt and contour for a more defined appearance, ideal for targeting and reducing fat in various areas of the body.

BO-DCA IS **HIGH-VOLUME DCA** FOR MULTIPLE SESSIONS.

LOSE WEIGHT BY STARVING YOURSELF?

When you skip meals, your body loses fat but also muscle mass.

Naturally, your weight decreases, but the problem is that as you lose water and muscle, your basal metabolic rate (BMR) lowers, making your body more prone to gaining fat.
