Bromelain 01 ●

Lecithin 02 ●

01

## Bromelain

- Proteinase in pineapple
- Effect of lipolysis
- Treatment of inflammation and wound healing
- Reduced edema and pain

02

## Lecithin

- Stimulation of lipase activity
- Emulsification and transport of triglycerides in fat cells
- Fat cell wall degradation (detergent action)
- Dissolving bad cholesterol in the blood, such as waste products and triglycerides clogged in blood vessels, and discharges them out of the body (Prevent unnecessary accumulation of fat)

01

The fat constituents in fat cells change the composition of the storage form so that it can be used as an energy source, thereby **reducing the number of fat cells while also reducing the size of fat to maximize the reduction of fat.**

02

Dismantling fat cells and producing **collagen to increase skin elasticity.**

03

It can quickly release decomposed fat cells by facilitating lymphatic circulation, making them effective **in reducing edema and removing cellulite.**
