

# YELLOW BOTTLE

BROMELAIN X RIBOFLAVIN X HYDROGENATED LECITHIN  
AMPOULE SOLUTION FOR FACE & BODY  
BROMELAIN 100ppm  
10mL x 5 vials

# INTRODUCTION

## *Fat* breakdown

Yellow Bottle enhances skin elasticity and reduces the appearance of wrinkles. Unlike conventional lipolysis products that can cause wrinkles during the fat breakdown process, our specially formulated blend—rich in Riboflavin, Cyanocobalamin, and L-Carnitine—accelerates lipolysis while effectively dissolving fat cells, all while safeguarding against wrinkle formation.

---

## *Enhance* skin elasticity, reduce wrinkles

Yellow Bottle incorporates potent components, including Lecithin, Bromelain, and Riboflavin (Vitamin B2), to facilitate effective fat metabolism.

Lecithin, known for its lipophilic properties, aids in the absorption of fats and promotes the activation of lipase—an enzyme responsible for hydrolyzing triglycerides into fatty acids, which are subsequently utilized as an energy source by the body's cells.

### Bromelain

Bromelain is a blend of compounds extracted from the pineapple plant (*Ananas comosus*), primarily sourced from its fruit, stem, and juice. It contains enzymes that have been used in traditional medicine for centuries.

### lecithin

Lecithin is a yellow-brown fatty substance from plants that attracts water and fats. It improves texture and emulsifies mixtures, commonly sourced from soybeans, egg yolks, and sunflower seeds.

### Riboflavin

Riboflavin (vitamin B2) is essential for energy production by metabolizing fats, carbs, and proteins. It gives a yellow tint to foods and supplements, and due to its light sensitivity, it should be stored properly to avoid degradation.

# TREATMENT

## Facial Treatment

The face is divided, treating left and right sides along the jawline. Using 0.1 to 0.25 ml per point, four lines are designed on each side, totaling approximately 5.0ml per side. The amount can be adjusted based on fat levels, using one vial for both procedures.

**Total: 10.0ml is used**

## Forearm Treatment

The amount used is consistent with facial procedures, applying 0.5ml to 1.0ml per point. About 20 points on each forearm, including 10 on the inner and lower areas, are treated. For one side, approximately 15.0ml is used, with a total of 20.0~30.0ml for both forearms.

**Total: 20.0~30.0ml used**

## Abdominal Treatment

Approximately 1.0 to 2.0ml per point is used, totaling about 50ml for the treatment. The upper abdomen receives approximately 20 points centered on the navel, with 15 points on each side and 10 points on each side area.

**Total: 30.0~50.0ml used**

## Thigh Treatment

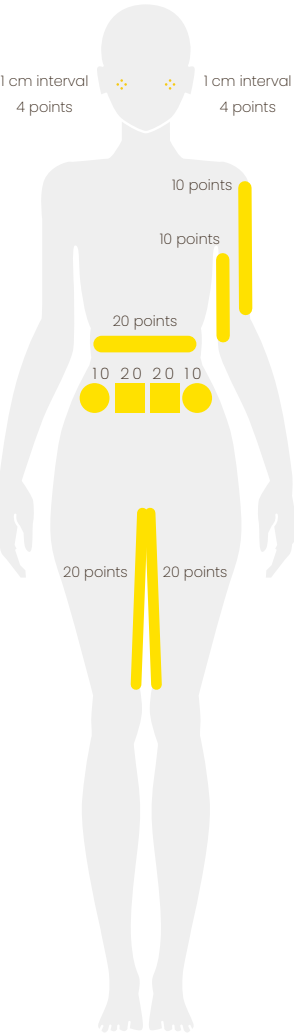

Similar to forearm treatment, the inner and lower thighs are treated. Administering approximately 10.0 to 20.0 ml per thigh, about 20 to 30 points are treated. Each thigh receives approximately 10.0ml, totaling 20.0ml for the entire procedure.

**Total: 20.0~40.0ml used**

## Hip-up Treatment

The procedure, above the buttocks' lower line (banana line), uses 0.5 to 1.2ml at 1.5cm intervals along the line. Repeated on the opposite hip, using 10~15 points per hip, approximately 10ml is used. Pine Bottle removes fat from sagging buttock skin.

**Total: 10.0~20.0ml used**

## Total Usage Volume

Treatment Area	Dosage of point	Depth	Interval of Point	Number of Point
Face (Sub-mental)	0.1-0.25cc (0.5-0.8cc)	2-4mm	0.5-1.0cm	20-25 points
Body	1.0-2.0cc	6-12mm	1.5-2.0cm	30-7.0 points

## Procedure of Process

week 1	week 2	week 3	week 4	week 5
Basic Program			Additional Program	

Treatments occur 1 to 3 times, with a 4-week gap between sessions. Post the 3rd treatment, the interval increases, and additional procedures are tailored to the patient's needs. Gradual adaptation is emphasized over rapid fat reduction.

# CAUTIONS

## Before treatment

- Adhere to the recommended dosage.
- Avoid administering small quantities as is common in Mesotherapy.
- Do not mix with other substances, including saline solutions.

## Cautions:

- Products should be kept at room temperature.
- Do not apply close to the eye area.
- Utilize the ampoule right after opening.
- This product is intended for one-time use only and should not be reused.

## After treatment:

- Maintain hydration by drinking ample water.
- Refrain from eating late-night meals.
- Do light exercise and massage into your routine.
- For the first 2 to 3 days, avoid using hot towels or visiting the sauna.

## How many sessions are required

Recommended a treatment program consisting of 3 to 4 sessions over a duration of one month for patients.

# MECHANISM

## ① Metabolic activation with riboflavin

Riboflavin boosts the body's metabolism, specifically focusing on fat cells to promote more efficient breakdown and energy conversion, thereby accelerating the fat reduction process.

## ② Isolation and removal of fat cells

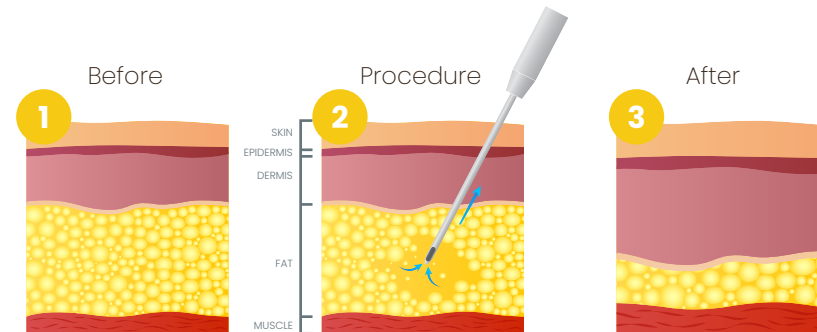

The treatment targets and isolates fat cells, facilitating their natural expulsion from the body, making it especially effective for stubborn fat areas.

## ③ Quick lipase reduces inflammation

It boosts lipase enzyme activity for faster fat cell breakdown while simultaneously mitigating inflammation to ease recovery and enhance comfort.

## ④ Skin health improvement

Alongside fat reduction, it promotes better skin health, contributing to firmer, more elastic skin by supporting collagen production and hydration.

# YELLOW BOTTLE VS OTHER PRODUCTS

Yellow Bottle offers a sophisticated solution in the innovative landscape of body sculpting and weight management. The approach to non-invasive fat reduction.

## PPC PRODUCTS

### Innovative Formulation

Mainly rely on Phosphatidylcholine and Sodium deoxycholate, with less emphasis on other enhancing agents

### Targeted Fat Reduction

Focused fat targeting, yielding varying results based on technique and formulation

### Enhanced Efficacy

Optimal results depend on the PPC concentration and the area being treated

### Safety Profile

Clinically documented safety, but potential side effects include swelling, bruising, and mild pain.

### Ease of Use

Administered by professionals, typically requiring visits to the clinic.

### Cost-Effective

Assessed based on the cost of treatment, the number of sessions, and the longevity of results

## YELLOW BOTTLE

Uses an enhanced ingredient mix of Bromelain, Riboflavin and Lecithin for better fat dissolving

Masterfully targets and reduces fat in precise areas for maximum impact

Achieves a quicker reduction in fat, offering enhanced results in less time compared to other methods

Fewer side effects contribute to a higher level of user satisfaction and broader acceptance

Easy application, decreases the number of sessions

Delivers better results at a lower cost, potentially requiring fewer sessions for longer-lasting outcomes.

# SPECIFICATION & MAIN INGREDIENTS

## Product name Yellow Bottle

**Intened use**  
Slim solution for face & body

**Packing unit**  
10ml X 5 vials

**Composition**  
Water, Ananas Sativus (Pineapple) Fruit Extract, Bromelain, Lecithin, Salvia Miltiorrhiza Root Extract, Chamomilla Recutita(Matricaria) Extract, Scutellaria Baicalensis Root Extract, Riboflavin, Sodium Chloride, Centella Asiatica Extract, Pentylene Glycol, Cyanocobalamin, Papain, Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7, Ascorbic Acid, Glutathione, Adenosine, Carnitine, Arginine, 1,2-Hexanediol

## Bromelain

Bromelain (Ananas sativus) is a group of enzymes from the pineapple plant, mainly found in its fruit, stem, and juice. It aids weight loss by improving digestion and potentially boosting metabolism. Bromelain also breaks down proteins into smaller peptides, enhancing nutrient absorption. It alleviates post-exercise muscle soreness by reducing inflammation, speeds recovery, **and may support immune function while preventing blood clots, promoting cardiovascular health.**

## Riboflavin

Riboflavin (Vitamin B2) is a vital water-soluble vitamin that supports energy production and the metabolism of fats, carbohydrates, and proteins. Its bright yellow color appears in supplements and fortified foods. Riboflavin aids in converting amino acids and fatty acids into energy, promotes cell growth, and maintains healthy skin. Regular intake is essential to prevent deficiencies that **can lead to skin issues and light sensitivity, making it important for overall health.**

## Lecithin

Lecithin aids in fat breakdown, supporting liver health and preventing fatty liver. It maintains cell membrane structure, ensuring nutrient transport and proper function. It also helps move nutrients into cells and waste out, supporting metabolism. In cosmetics, **lecithin enhances ingredient blending and improves product texture.**

## QUESTION & ANSWER

Q1

### What is Yellow Bottle and how does it work?

Yellow Bottle, a lipolysis solution with Riboflavin, Bromelain, and Lecithin, effectively reduces fat. Recommended for face and body application.

Q2

### How does Yellow Bottle differ from others?

Unlike formulas with potential side effects, Yellow Bottle is free from DC/PPC contents. Manageable swelling and pain may occur without disrupting daily life.

Q3

### Are there any benefits beyond Lipolysis?

Yellow Bottle offers skin-lifting, wrinkle removal, and improved elasticity. Enhances overall skin health and brightness.
